

Product Stewardship Policy & Principles

Policy:

Camida's Product Stewardship objective is to source and supply products which may be used safely throughout their life-cycle and which will have minimal effect on the environment. Camida believes this will be achieved by promoting responsible and ethical behaviours and practices amongst all associates with the sourcing, sale, use and disposal of its products and by assessing any safety, health or environmental risks that may exist during their life-cycle.

Principles:

1. Camida recognises the importance of Product Stewardship and will communicate same with other written policies and guidelines such as Camida's Responsible Care program, H&S and Quality Management System. All of which have been approved by the senior management of Camida.
2. Camida will comply with all relevant legislation and regulations affecting registration, distribution, sales, use and disposal of the products its supplies.
3. Camida's personnel will be helped to understand their roles in the implementation of Camida's Product Stewardship objectives and will be appropriately trained in this regard.
4. Camida will source and sell products that do not pose an unacceptable risk to human and environmental safety when applied in the appropriate manner and for the intended uses.
5. Users of the product Camida supplies will be provided with relevant product information and/or training to enable them to carry out their activities in a safe manner and with minimal effect on the environment.
6. Camida's Product Recall procedure (QP 8.3, Sec 6) has been put in place to deal with adverse incidents involving products Camida supplies.
7. Camida will participate in activities which enhance awareness and understanding in the wider community of the Product Stewardship principles to which it subscribes.
